

## **Sekisui House Included in DJSI World Index for 4 Years Running Part of DJSI Asia Pacific Index for 3 Consecutive Years**

On September 14, 2019, Sekisui House, Ltd. was selected for inclusion in the Dow Jones Sustainability Indices (DJSI) World Index - the fourth year in a row that Sekisui House has been selected. This year, 318 companies out of about 2,500 listed global companies were included in the DJSI World Index, with Sekisui House one of 33 Japanese companies chosen.

Sekisui House was also selected as part of the Dow Jones Sustainability Asia Pacific Index (DJSI Asia Pacific) for the third consecutive year.

The DJSI World Index and DJSI Asia Pacific Index are sustainability stock indices jointly developed by S&P Dow Jones Indices of the U.S. and RobecoSAM of Switzerland. These indices evaluate the sustainability of companies according to the three aspects of economy, environment and society, and are seen as some of the most important information for institutional investors concerned about a company's ESG and other non-financial performance.

Sekisui House sees the survey it undergoes for inclusion in the indices as an important indicator of the group's ESG management. The company also recognizes that society expects corporations to implement the assessment items and contribute to achieving a sustainable society, and the group utilizes a PDCA business cycle to meet those expectations.

In its Sustainability Report 2019 issued in May, Sekisui House presented for the first time its initiatives and activities that are focused on sustainability and SDGs. These initiatives are the result of analysis of the risks and opportunities that will arise from the trend of changes in society, and how that impacts the business environment.

Sekisui House will continue to accelerate the implementation of our ESG initiatives, proactively disclose all relevant information, and strive to be a leading company in ESG management as demanded by today's society.
